

Winches Sales Guide

WINCHES

Key Markets

- **Radial Line Winch:** Cruisers and performance cruisers.
- **Performa winches:** These winches combine the efficiency of the Radial line with the sandblasted drums of the carbon-fibre race winches. Optimised to handle high-tech lines used on sportsboats, small race boats and performance cruisers. Available in sizes 20 - 80 (plain top and self tailing) and 40 - 46 Quattro.

WHY HARKEN WINCHES?

- **Maximum holding power with minimum line wear**
 - Radial winches feature non-abrasive diagonal ribs to hold line securely and reduce line wear
 - Performa winches are designed to take high-tech lines, which tend to be narrower in diameter
- **Adjustable stripper arm integrated into winch top for safer operation**
 - Stripper arm completely covers rotating winch top, preventing fingers and clothing from catching in moving parts
- **Smooth, controlled easing**
 - Patented angle of ribs drives line wraps down when easing to keep them on the part of the drum that provides the best control
- **Power-grip jaws shaped for easy line entry and optimum hold.**
 - Lower jaw adjusts under line pressure and accepts a variety of line sizes
 - Teeth grip evenly with or without load
- **Simple to install, easy maintenance.**
 - Patented mounting system for fast, one-person installation without removing drum
 - Easy to disassemble for service on deck; socket, washer, and screw-top snap fit together for mistake-free reassembly
 - Snap-fit design keeps bearings captive when drum is removed for maintenance
 - Composite roller bearings don't require lubrication
- **High-strength, lightweight**
 - Weight savings of 25 to 50 percent compared to Harken Classic winches
 - High-strength composite roller bearings and bushings reduce friction under load
 - Load-carrying gears and pins are 17-4 PH stainless steel for strength and corrosion resistance

RADIAL WINCH PRICING

Generic Boat Size ft (m)	Winch Size required (Halyard winch)	Winch Size required (Genoa winch)
20-28 (6 - 8.5)	20	35.2
